- Creativity
- Negotiation
- Research

LANGUAGES

- English
- Sinhala

PROGRAMMING LANGUAGES

- **PHP** – for backend and web application development
- **JavaScript** – for interactive and dynamic web features
- **HTML** – for web page structure and layout

PROFILE

I am a hardworking and passionate Software Engineer with experience in developing web-based systems using PHP, MySQL, HTML, CSS, and JavaScript. I have worked on different management systems like ERP, payroll, transport, and production. I enjoy learning new technologies and creating solutions that make work easier and more efficient.

WORK EXPERIENCE

MIAMI Clothing (Pvt) Ltd

2020 - PRESENT

Software Engineer

- Contributed to the design, development, and management of various in-house systems, including Production Management, MIS, Logistics (Gate Pass), Post Costing, Transport, Efficiency, Stores, QA, CRM, and Machine Systems. Also managed ERP, ACCPAC, HCM, GAPRO and RAISE systems, focusing on enhancing functionality, optimizing performance, and ensuring efficient database management. Handled hardware-related issues to ensure smooth operation of all systems. Additionally, developed and maintained the company's official website — www.mcl.lk — to strengthen its digital presence.

MIAMI Export (Pvt) Ltd

2019 - 2020

Software Engineer

- Developed and maintained multiple in-house systems, including Production Management, MIS, Logistics (Gate Pass), Post Costing, Transport, Efficiency, Stores, HCM, and QA systems to streamline company operations and improve productivity.
- **Key Skills:** PHP, MySQL, HTML, CSS, JavaScript, jQuery, JSON, AJAX System Design, Database Management

The Travelport (Pvt) Ltd

2018 - 2019

PHP Developer

- Managed RAISE Payroll System and developed company websites (www.thetravelport.lk and www.flynnow.lk) using PHP, MySQL, HTML, CSS, JavaScript, jQuery, JSON and AJAX to enhance online presence and streamline HR operations.

Softknowledge Business Solutions (Pvt) Ltd

2017 - 2018

PHP Developer

- Contributed to the development and enhancement of several enterprise applications, including GAPRO (Garment ERP), RAISE (Payroll System), TREAT (Transport Management System), and E-Shipping System, improving business process automation and operational efficiency.

- **CSS** – for styling and responsive design
- **jQuery** – for simplified JavaScript and AJAX operations
- **SQL / MySQL** – for database design and management
- **JSON / XML / AJAX** – for data exchange and web communication
- **Java (Android)** – for basic mobile application development
